

Reflecting on Your Teaching Practice

Learn to use your Teacher reports to reflect on the effectiveness of your instructional delivery.

Teacher Value-Added Summary

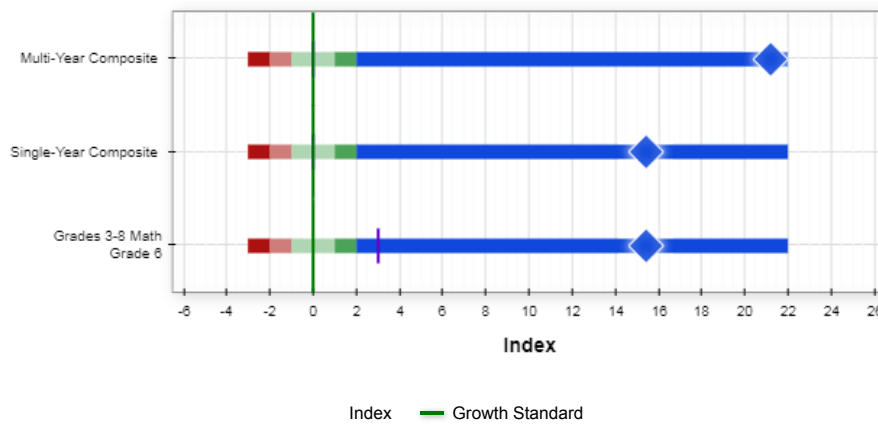

Teacher Value Added Summary displays data from all of your value-added reports. If you received reports in multiple grades or subjects, it can be useful to begin by comparing the Growth Index values across grades, subjects, and courses. All index values are on the same scale, so they can be compared directly. As you compare the data, you'll want to ask these questions:

- Are the Growth Index values similar across all grades, subjects, and courses, or are they different?
- What factors might have contributed to these similarities or differences?

Report: Teacher Value-Added Summary
School: Seymour Middle School
District: Sevier County
Teacher: JOHN WEEKLY (286300)

Teacher Composite		
Subject	Index	Level
Multi-Year Composite	21.20	Level 5
Single-Year Composite	15.41	Level 5

2018 Single-Year Growth Measures				
Subject	Growth Measure	Standard Error	Index	Level
Grades 3-8 Math, Grade 6	18.7	1.2	15.41	Level 5

Rules for Effectiveness Level Determination

- Level 5, Most Effective:** Significant evidence that the teacher's students made more progress than the Growth Standard (the teacher's index is 2 or greater)
- Level 4, Above Average Effectiveness:** Moderate evidence that the teacher's students made more progress than the Growth Standard (the teacher's index is between 1 and 2)
- Level 3, Average Effectiveness:** Evidence that the teacher's students made progress similar to the Growth Standard (the teacher's index is between -1 and 1)
- Level 2, Approaching Average Effectiveness:** Moderate evidence that the teacher's students made less progress than the Growth Standard (the teacher's index is between -2 and -1)
- Level 1, Least Effective:** Significant evidence that the teacher's students made less progress than the Growth Standard (the teacher's index is less than -2)

Note: When an index falls exactly on the boundary between two colors, the higher growth color is assigned.
